

**ABSTRACT**

Antisense compounds, compositions and methods are  
5 provided for modulating the expression of PPAR-delta. The  
compositions comprise antisense compounds, particularly  
antisense oligonucleotides, targeted to nucleic acids  
encoding PPAR-delta. Methods of using these compounds for  
modulation of PPAR-delta expression and for treatment of  
10 diseases associated with expression of PPAR-delta are  
provided.
